

# HEALTHCARE AT YOUR FINGERTIPS

The myHPP app was developed by patients and physicians to transform patient care and inform hypophosphatasia research. It puts patients in charge of tracking their health and makes them a valuable partner in research for better HPP treatment and care. With a user friendly interface, users can track their medication, appointments, injection schedules, insurance, and more.

Join us in taking actionable steps to transform healthcare by downloading the app in the Apple Store or Google Play Store today!

## FAQS

### Who has access to my data?

The Soft Bones myHPP app was designed to unite people who share the desire to better understand hypophosphatasia and who agree to share anonymous data about their symptoms to alter the future of hypophosphatasia treatment. Soft Bones will have access to certain data to help inform research, but does not have access to any personal information.

### How often do I need to track my symptoms?

This app was designed with the patient in mind. Therefore, the more you put into it, the more accurate and helpful your data will be in the short and long run. The data collected will lead to robust research for HPP. The app is intended to be flexible with your user style and to have a more informed conversation with your healthcare team. We recommend that users update their symptoms at least once a month to make sure data stays up to date.

### Find our app in the Apple Store or Google Play Store

Soft Bones, Inc.  
141 Hawkins Place #267  
Boonton, NJ 07005

# Manage Your Health

# Contribute to Research

# APP FEATURES

## My Health Report

The app will automatically generate a My Health Report that you can print and take with you to doctor appointments. The report summarizes symptoms that you have tracked to show trends. As a result, it can help facilitate a more productive dialogue with your treating physician.

## Trackers

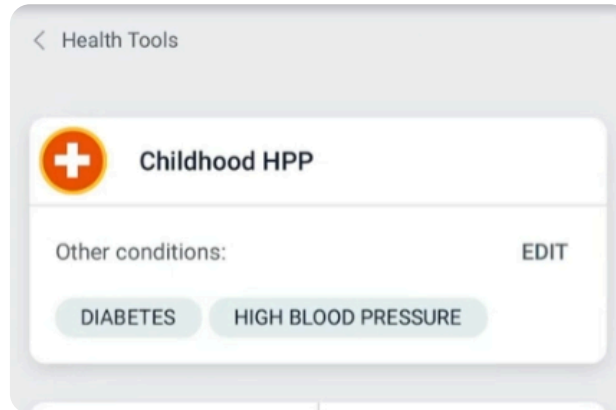

The app is designed to help patients track their progress. You can track your medication, dosages, appointments, injection times, and more.

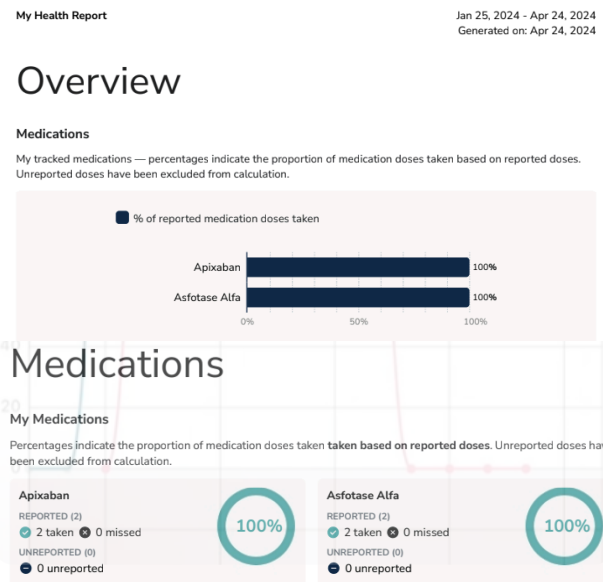

## Research

Here at Soft Bones, we see people as partners in research, not subjects. To improve treatment options and care, health data is crucial to capture. Help us identify the needs of patients and families to create evidence-based approaches and uncover new goals for therapies.

*Invest in your health while supporting research.*

*Streamline your healthcare information all in one place*

# TECH SUPPORT

## Appy Hour

We will host Appy Hours over Zoom for you to learn more about myHPP and how to navigate the app.

Please visit the Soft Bones calendar for upcoming scheduled Appy Hours: <https://softbones.org/events/> or scan the QR code.

## Genius Bar

Come visit our "Genius Bar Forum" located on our **HPP AND ME** platform. Get personalized support using the myHPP app. With technical support from myHPP users and the creators of the app, we hope to provide the necessary information and resources to optimize your app usage.
