Soft  Bones
Finding the Key to HPP

I am on Strensiq® (asfotase alfa), an enzyme replacement therapy to treat HPP

Studies have shown that there is analytical interference between asfotase alfa and laboratory tests that utilize an alkaline phosphatase (ALP)-conjugated test system, rendering erroneous test results in patients treated with STRENSIQ®. ALP-conjugated test systems are utilized to measure substances such as hormones, bacterial antigens and antibodies.¹

Therefore, it is recommended that laboratory assays which do not have ALP-conjugate technology be used when testing samples from patients who are receiving STRENSIQ.

For more information, healthcare practitioners should call
