FDA Med Watch: To report medication side effects		<u>1-888-463-6332</u> ext. 2		
FEMA/Red Cross/ Salvation Army				

## Medical Condition: Hypophosphatasia (HPP)

A rare genetic disorder characterized by impaired mineralization (“calcification”) of bones and teeth. Problems occur because mineralization is the process by which bones and teeth take up calcium and phosphorus required for proper hardness and strength.

## Care Instructions

Handle with care, bones are prone to fracture. \_\_\_\_\_
